Built-in Quality

Change is inevitable, whether it is driven by you, your customers, competition, compliance or regulations. Trissential leverages Continuous Quality, our industry leading end-to-end approach to built-in quality. Maintaining high quality in a digital business environment is essential to accelerating change - when paired with Business Agility you can deliver faster, better, and more effective customer outcomes. **Quality is in our DNA.**

What Are They Saying?

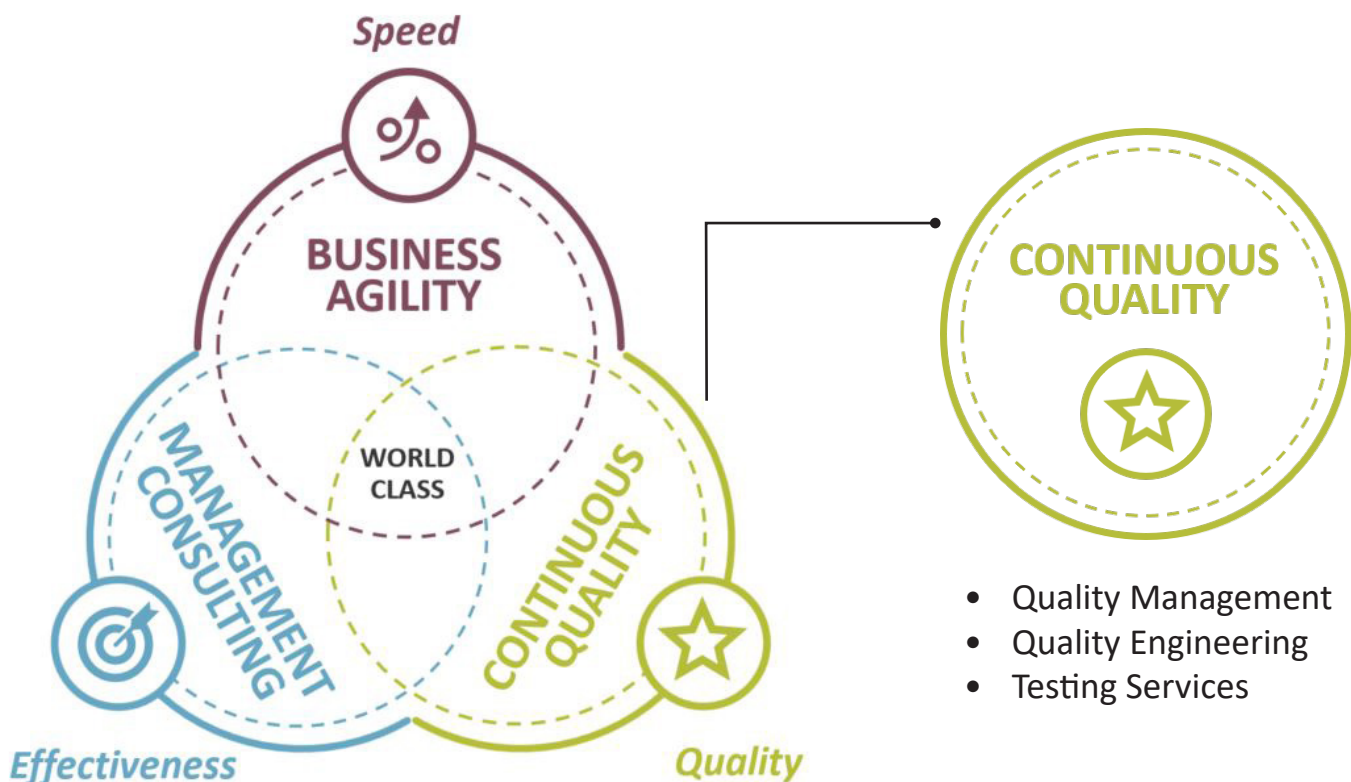

According to multiple 2018 Quality reports:

- **87% of Quality teams said IT management is on board with test automation including spending money to support it**
- **76% say they are automating their testing yet for all of the time, effort, and money being spent on automation only 25% of Quality teams say they have automation coverage greater than 30%**

Trissential works with organizations to implement important Quality Management, Quality Engineering, and Testing Services in order to strike the right balance between test automation and Total Quality Management in order to continuously improve Quality outcomes.

Our Vision on Continuous Quality

We aspire to be our customers' quality partner, providing services, solutions, and thought leadership to help them meet business goals. We aim to provide a full portfolio of quality services and methodology delivered by trained and experienced quality professionals.

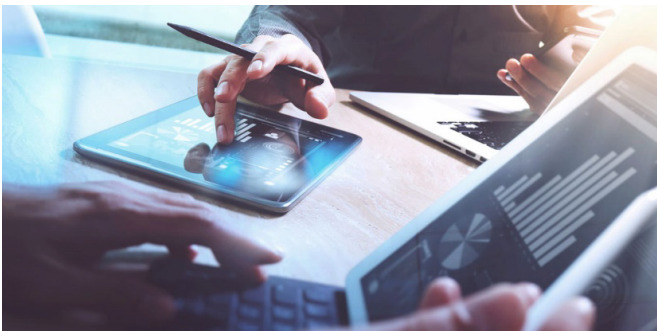

Continuous Quality Offerings

Quality Management Services focus on implementing a benefit driven, risk focused, and confidence based quality model which prioritizes defect prevention as a key aspect of effective business change management.
