SUMMARY

Nationally recognized technology leader and public speaker. Over 40 years' experience in technology leadership positions. Demonstrated expertise in technology governance, cyber security, strategic planning and management of budgets, procurements, projects and infrastructure. Strong communication skills demonstrated frequently through interactions with partners, clients and residents.

EXPERIENCE

- As the Director of Technology Consulting for the Public Technology Institute, I lead the consulting practice and deliver services to local municipal organizations to enhance the effectiveness of information technology and improve cybersecurity readiness.
- Projects include strategic plan development, artificial intelligence policy development, multi-million-dollar contract procurement management, IT workforce assessment, CIO recruiting, CISO recruiting, cyber security controls assessment
- Served as CIO for Chesterfield County, Virginia for 17 years, leading a department of 125 IT professionals and managing a \$50M budget focused on delivering innovative services to residents. Under my leadership, recognized as the #1 digital county in America four times.
- As Senior Fellow for Govtech.com, I speak at national conferences, moderate webinars, judge survey contests and provide thought leadership.
- For a nation-wide consumer electronics retailer, provided leadership for all infrastructure software development and support of a 700-store chain.
- Recognized as a "Top 25 Doer, Dreamer and Driver" in the nation by Government Technology Magazine.
