Audience

ASPIRING AND NEW PUBLIC
SECTOR IT SUPERVISORS &
MANAGERS

FROM TECHNICAL EXPERT — TO CONFIDENT LEADER

Foundations of IT Leadership gives IT managers the professional skills to **support and manage technology operations for local government** — the leadership judgment, communication, and self-awareness that technical training alone doesn't provide.

WHAT GRADUATES WALK AWAY ABLE TO DO

01

Lead people, not just systems

Build the leadership, followership and emotional-intelligence skills to motivate and guide technical teams.

02

Drive change & protect focus

Guide teams through change and manage time and priorities so the important work doesn't get lost.

03

Champion security & ethics

Model cybersecurity awareness and navigate vendor relations with sound, practical ethics.

04

Lead in the age of AI

Understand how artificial intelligence is reshaping public-sector IT and put it to work responsibly.

THE CURRICULUM — SEVEN MODULES OVER 8 WEEKS

MODULE 1

Leadership & Followership

Understanding the fundamentals of leading a team.

MODULE 2

Cyber Security Awareness

The security mindset and habits every IT leader must model.

MODULE 3

Change Management

Guiding people and organizations through technology change.

MODULE 4

Productivity & Time Management

Focus, prioritization and managing competing demands.

MODULE 5

Emotional Intelligence

Self-awareness and empathy that strengthen leadership.

MODULE 6

Practical Ethics & Vendor Relations

Sound judgment in procurement and vendor partnerships.

MODULE 7

Artificial Intelligence

What AI means for public-sector IT leaders today.

INCLUDED

Certificate of Completion

Awarded for completing the live series. No capstone requirement.

WHO IT'S FOR

Built for the next public-sector IT leader

Current and aspiring supervisors and managers in government IT — technical professionals ready to step into leadership roles.

New IT supervisors

Aspiring managers

Team & project leads

IT pros on the rise
